PROFESSIONAL SUMMARY

Web application developer transitioning into UI/UX design, combining hands-on front-end and back-end development experience with a long-standing passion for design, from freelance visual work to a deeper focus on how products look, feel, and function for the people using them. Passionate about creating interfaces that are not just visually polished but intuitive, usable, and grounded in real user needs.

SKILLS

UI/UX Design: User research fundamentals, Typography, Color Theory, Grid Systems, Design Thinking, Responsive Design, Accessibility (WCAG), Wireframing, Prototyping, Interaction Design

Design Tools: Figma, Adobe Photoshop, Canvas

Front-End: HTML5, CSS3, JavaScript, TypeScript, React

Research & process: User interviews, Usability testing, Persona development, User flows, A/B testing

Databases: T-SQL, MySQL, SQLite

Collaboration: Agile/Scrum, Cross-functional teamwork, Design-to-code handoff, Jira, Confluence

PROFESSIONAL EXPERIENCE

Application Developer at Oracle, Quebec (Jan 2020 – April 2026)

- Designed and developed front-end and back-end components for business applications, working directly on the interfaces and workflows end users interacted with daily.
- Analyzed system specifications and business processes to translate requirements into functional, user-facing solutions.
- Collaborated cross-functionally to integrate enhancements and resolve usability and functional bugs.
- Wrote, tested, and debugged application code, developing a strong instinct for what is realistically buildable — a perspective now applied to design work.

Real Estate Agent (Part-Time) at Blouin Immobilier, Quebec (April 2021 – December 2023)

- Welcomed clients and presented available properties, coordinating visits and guiding rental decisions.
- Provided personalized follow-up on client requests to ensure satisfaction and efficient service.

Sales Advisor at LA Liberte, Quebec (April 2019 – December 2019)

- Built client relationships and supported merchandise presentation and sales operations.

Sales Representative at SDI Marketing, Montréal (April 2018 – February 2019)

- Prospected and acquired new clients, promoting and selling financial products.

Administrative and Marketing Assistant, Tunisia (November 2014 - May 2015)

- Created visual materials and publicity flyers using Adobe Photoshop, combining organizational skills with creative design to support marketing efforts.
- Assisted in planning and executing advertising campaigns to promote company services.
- Managed daily administrative tasks including scheduling and client communications.

Intern at Centre National Technologies Éducation, Tunisia (January 2013 - April 2013)

- Tested and debugged user interfaces and contributed to HTML programming for the organization's website.
- Participated in all phases of system design, gaining early exposure to the design-development relationship.

UI/UX Design

Concordia, Continuing Education Montréal

Covered foundational UI/UX principles, including user research, wireframing, prototyping, and usability best practices using Figma.

Programming and Internet Technologies (AEC)

Institut Supérieur d'Informatique, Montréal

Focused on modern programming languages, web development, and networking technologies.

Applied License in Computer Science

Institut Supérieur de Gestion, Tunisia

Studied core principles of computer science, including algorithms, data structures, and software development.

Mathematics Bachelor

Lycée Secondaire Mourouj, Tunisia

Developed a strong foundation in mathematical theory and problem-solving techniques.
